Description

About This Product - HALO HLBC 4 in. Ultra-Slim Regressed LED Downlight Selectable CCT with D2W Option

The HALO HLBC is a slim LED downlight designed with visual comfort in mind. It features a regressed prismatic lens for superior glare reduction, while maintaining an ultra-thin 1/2 in. fixture thickness above the ceiling plane. This means the HALO HLBC can be installed virtually anywhere, regardless of plenum space. The HLBC is perfect for new construction, remodel, or retrofit jobs. During installation, select the perfect color temperature for your space with 5-color temperatures between warm (2700K) to daylight (5000K) or dim-to-warm option. The dim-to-warm setting begins at 3000K and

dims smoothly to 1800K, creating a rich, warm glow resembling candlelight or the sun on the horizon. The HALO HLBC is an ideal solution for residential and light commercial applications where visual comfort and installation flexibility are a priority.
